**RE: Inspire Energy Holdings, LLC Environmental Disclosure Statement**

Dear Ms. Rolando,

Attached, please find a copy of Inspire Energy Holdings, LLC's Environmental Disclosure Statement for the twelve (12) month period ending March 31, 2023, accompanied by a certification. Given the Commission's allowance for electronic signatures, I have modified the certification to match the Commission's suggested language. Do not hesitate to contact me should you have any questions.

Sincerely,

/s/ Dan Bell

# Environmental Disclosure for the Electricity Products of Inspire Energy Holdings, LLC

**For 04/01/2022 - 03/31/2023**

The disclosure of this information is required under Section 16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill Admin. Code 421.

The below data reflects the mix of electricity sources in the PJM region. You will not have electricity from a specific generation facility delivered directly to your service address, but Inspire ensures that the applicable percentage of your electricity usage is offset by the generation of energy from renewable resources on an annual basis. Inspire does so by purchasing and retiring 'renewable energy attributes' or 'renewable energy certificates' representing the environmental attributes associated with the applicable amount of renewable energy generation from the renewable sources specified for your product. Your purchase helps support the development and operation of renewable energy in the areas specified for your product.

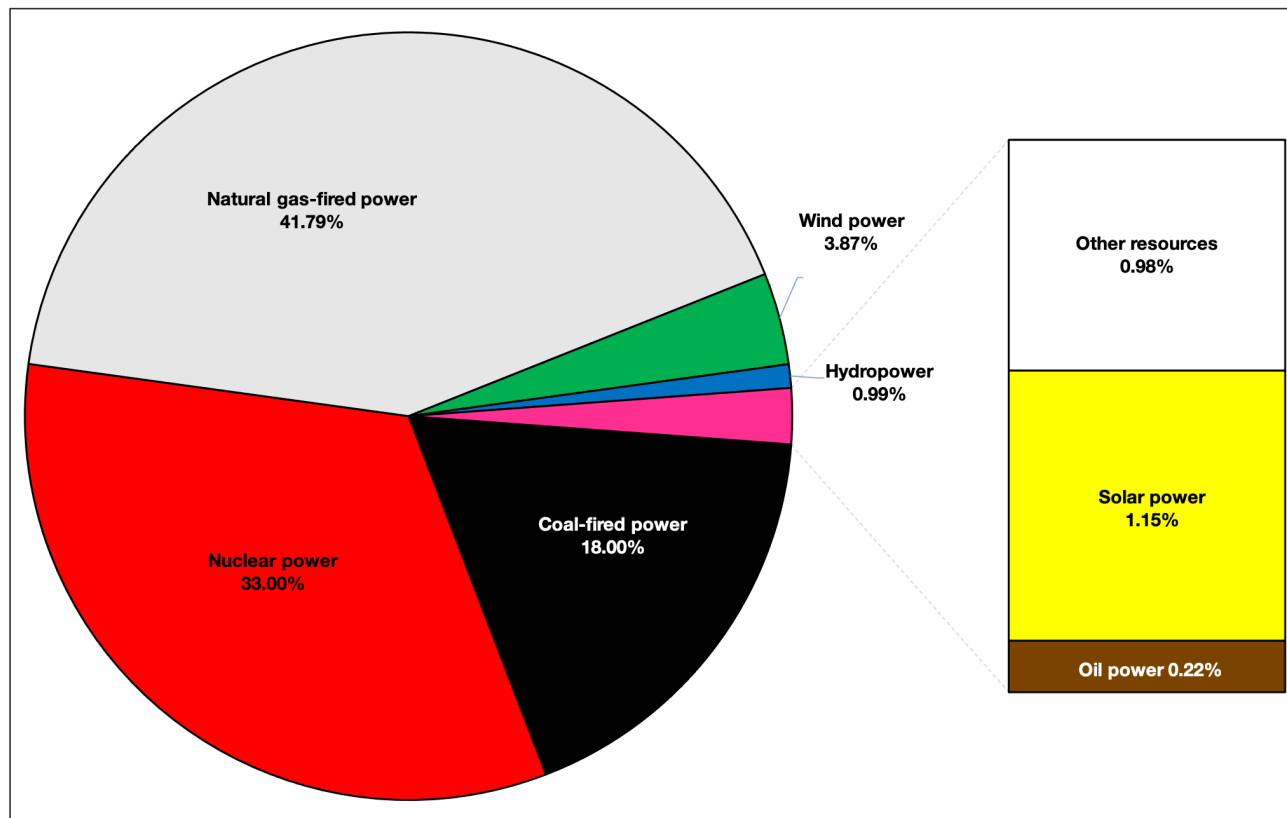

## Exhibit A: Sources of Electricity Table

Sources of electricity supplied from 04/01/2022 - 03/31/2023

Sources	Percentage of Total
Biomass	0.00%
Coal-fired	18.00%
Hydro	0.99%
Natural gas-fired	41.79%
Nuclear	33.00%
Oil-fired	0.22%
Solar	1.15%
Wind	3.87%
Other	0.98%
Unknown resources purchased from other companies	0.00%
<b>Total</b>	<b>100.00%</b>

## Exhibit B: Sources of Electricity Chart

Sources of electricity supplied from 04/01/2022 - 03/31/2023

## Exhibit C: Air Emissions

AVERAGE AMOUNTS OF EMISSIONS and AMOUNT OF NUCLEAR WASTE per 1,000 kilowatt-hours (kWh) PRODUCED from KNOWN(1) SOURCES for the 12 months ending 03/31/2023.

Type	Quantity
Carbon dioxide	777.53
Nitrogen oxides	0.30
Sulfur dioxides	0.39
High-level nuclear waste*	Unknown
Low-level nuclear waste*	Unknown

(1) 100% of the total electricity supplied was purchased from other suppliers and the amounts of emissions and amount of nuclear waste attributable to producing this electricity is not known and is not included in this table.

(2) By connecting to the local energy grid, the electricity you receive comes from a mix of energy sources. You will not receive electricity from any specific generation facility delivered directly to your service address, however, Inspire ensures that 100% of your electricity consumption is sourced from renewable energy generation facilities or otherwise paired with Renewable Energy Certificates (“RECs”) from renewable energy generation facilities located in the U.S. By purchasing RECs to match your electricity usage and retiring them in a regional generation attribute tracking system, we enable you to directly support the continued use and development of renewable electricity. Increased demand for, and generation of, renewable electricity helps reduce carbon emissions and provides other local and global environmental benefits in the region where the renewable electricity generator is located.
